1. What does the LENGTH statement do?

2. What is the default length for character and numeric values?

3. What is a FORMAT statement?

4. What does the FORMAT statement do?

5. List the 3 of the SAS-defined formats for numbers and define them (there are 6 total, just list and define 3 – and not the formats for dates).

6. List 5 of the formats used for dates and define them (there are more than 5, just list 5 of them).

7. What is standard data and what is nonstandard data? Give an example of each.
