

Joint Laboratory Manager in Evolutionary and Conservation Genomics

Hohenlohe and Parent research groups

Department of Biological Sciences

University of Idaho

We are seeking a highly motivated lab manager to join our research groups in evolutionary and conservation genomics at the University of Idaho. The position will be shared between the research labs of Paul Hohenlohe and Christine Parent. The lab manager will help coordinate and facilitate ongoing research by:

- maintaining lab equipment, supplies, and protocols
- conducting molecular biology and genomics labwork, including RAD sequencing, whole-genome sequencing, and other techniques
- training and assisting students and visiting researchers in molecular genomics techniques
- contributing to the intellectual environment of the lab by participating in research discussions, designing experiments, and conducting independent research projects

The successful applicant should have a bachelors or masters degree in biology, molecular biology, or a related field, and experience working as part of a team in a research laboratory in molecular biology, ecological genetics, or related field. The position will begin as soon as possible. Initial appointment will be for one year, with the possibility to extend to future years. For further information please contact Paul Hohenlohe (hohenlohe@uidaho.edu) or Christine Parent (ceparent@uidaho.edu).
