

COMBINED HARVESTER TEST IS A BIG SUCCESS

Works Smoothly and Beautifully and Experiments are Highly Gratifying

After more than two years of hard labor and experiments, during which there were repeated setbacks which would have discouraged the average man, A. Anderson and Neil Quennell have sufficiently perfected their new combined harvester that experienced farmers who witnessed the trials yesterday afternoon declare that the implement would be revolutionary. It was announced by the inventors this afternoon that their success had been so gratifying that they would go ahead with the preliminary details for the establishment in Moscow of a factory, the structure and the necessary machinery to cost in the neighborhood of \$40,000.

The new combined harvester does the cutting, threshing and stacking and does away with the binder now in general use. The machine can be placed on the neck of a tractor which the present harvesting machines cost \$2,000. The present harvesters require from 30 to 40 horses to operate them and the new Anderson-Quennell is worked solely with four horses. It is stated that 60 or 80 are needed on the machine instead of six or eight. One is the driver and six or other the stacker.

The machine is simple in every particular. There are no belicky pieces of machinery and all of the workings are open. As the reaper moves down the standing grain, it is carried on the table and sent through three fans and in the experiments yesterday afternoon, the wheel was successfully tested. This is the third machine that Messrs Anderson and Quennell have manufactured. They worked for more than eight months on their first one but this was too heavy and therefore too expensive to manufacture. The machine they set to work on a second machine and although it was far superior to the first one, yet was too heavy to be the adjustment of the machinery. They worked with four horses according to the plans of the inventors. They had now worked nearly a year and a half without completion and they found themselves facing failure because they could not overcome their experiments when a Moscow man came to their aid. Jerome Day the millionaire mining man, came forward with a offer of assistance. He would furnish the funds whereby Messrs Anderson and Quennell could make the test for another year if need be. In Mr. Day's farm the two men went to work with renewed vigor and success has now crowned their efforts. The experimental yesterday afternoon was witnessed by many of the prominent farmers of the Palouse country. Fred had been sent out by the inventors that the experiment would be made at that time and one of Mr. Day's farms was the scene of this important event.

Everything went along very smoothly and all we will require now is the adjustment of the machinery," said Mr. Anderson. "The bearings are somewhat crude but the machine now smoothly and has convinced us of its practicability. It weighs very much less than the ordinary combined harvesters and we had just to require but four to six horses to make it along through the grain. It is estimated that four to six horses will cut about 30 acres a day and thresh and stack the grain with the aid of two men."

Here is what prominent citizens and farmers in Moscow will pay taxes on this year, the figures being taken from the assessment rolls just completed:

W. R. Sullivan, real estate and improvements, \$600; J. H. Hilditch, real estate, \$3,470; Spotted 60, real estate, \$4,165; North-west Pacific Railway company, real estate, \$1,150.

MAY LOCATE IN MOSCOW

W. C. English, who was formerly engaged in the furniture business in Kansas City, is in Moscow visiting with his brother-in-law, Herman Holmbeck.

"I have visited this section of the country and I am highly pleased with it," said Mr. English. "If conditions are being made by a number of citizens to have Mr. English engage in business in Moscow."

THE WEATHER

Partly clear, Aug. 9.—Fair and cooler tonight, Friday 8th.

Startling Disclosures Are Made in the Assessment Rolls Just Completed

BLIZZARD OF GOLD FROM 'SHOWSTORM'

The Showstorm mine, at Millers, Idaho, in which many Moscow citizens hold stock, will pay its first dividend September 1, when \$90,000 is to be distributed among fortunate ones. The Showstorm is capitalized at \$1,000,000, the par value of the shares being one dollar. Shares can only be purchased now at \$2.10.

RETIREES INJURY TO MISS L. LEU ADAIR

William Kroll Sells All Timber Holdings in Latah Co.

William Kroll, the timber magnate, has disposed of all his timber holdings in Latah county and the Sherrin Clark timber company, whose headquarters are in Minneapolis, with Western offices at Spokane, in which company he was not interested. Thirty deeds, covering all of the holdings of Mr. Kroll, were this afternoon sent to County Auditor Randall by Albert L. Flewelling, representing the Sherrin-Clark company. Nearly all of the instruments name the consideration at \$1.

The holdings affected by the transfer are located northeast of Moscow in the vicinity of Arvo. Some of the holdings are cut-over. Mr. Kroll's residence is named as though the county, Mich.

TEAM CLUB LEAGUE TO INCLUDE MOSCOW

A league composed of 10 clubs, four Spokane teams and organizations representing Moscow, Lewiston, Pullman, Colfax, Palouse and Couer d'Alene.

This is the proposition now on foot and which is being actively pushed in Spokane and other cities. Billie O'Connell, president of the city league, Spokane and the local baseball enthusiasts in the inland Empire, has launched the boom for such an organization and it is generally regarded that the "club" under O'Connell's direction, the cannot fail to materialize. The new electric railway will make the plan for Spokane to have at least one and may be two games every Friday night.

WOULD KIDNAP BARBER

Louis Hart's Friends Fear Inherent Grave Fears

Although the rumor could not be verified, there is current in the lobby of the Hotel Moscow today a report to the effect that the hotel manager employed by J. W. Hart, a barber shop here, has popularly known as "Oupid."

BUILDING SITES OF A NEW ORDER

The O. R. N. has announced a reduction of 30 cents per ton for that time. In the case of grain and flour from all stations on the Inland Empire, Washington and August 1st. With the reduction apply only to shipments which are made from Portland by rail.

SHUT DOWN LOGGING CAMPS

The Federal Lumber company has shut down all its logging camps in the timber in the northern part of the state. The company has a large amount of timber on its hands and it is reported that the company will be probably shut down in the near future.

There will be nothing doing in the O. R. N. until after the present program until the fall session. The present attorney is J. W. Hart, a barber shop here, has popularly known as "Oupid."
