

SCIENCE CURRICULUM TOPIC STUDY

PAGE KEELEY

Foreword by Harold Pratt

Bridging the Gap Between Standards and Practice

A JOINT PUBLICATION

NTApress®
NATIONAL SCIENCE TEACHERS ASSOCIATION

Contents

List of Curriculum Topic Study Guides	ix
Foreword	xi
<i>Harold Pratt</i>	
Preface	xiii
About the Author	xix
1. Introduction to Curriculum Topic Study	1
What Is Curriculum Topic Study (CTS)?	2
Why Study a Curriculum Topic?	5
Why Focus on Topics?	8
The Underlying Knowledge and Research Base	10
National, State, and Local Standards	10
Cognitive Research	12
Changes in Professional Development	13
Reading Research	14
Science Teachers and Teaching	14
Content Knowledge	15
Pedagogical Content Knowledge	16
Beliefs About Teaching and Learning	17
Having a Professional Knowledge Base	17
The Teacher Professional Continuum	18
2. Examining the Components of a Curriculum Topic Study Guide	19
The CTS Study Guide	19
Sections and Outcomes	19
Selected Readings	21
CTS Supplementary Material	21
Common Resources for Study and Reflection	22
Building a Professional Collection: Experts at Your Fingertips!	22
Descriptions of the Common Resources Used in CTS	24
IA: <i>Science for All Americans</i>	24
IB: <i>Science Matters: Achieving Scientific Literacy</i>	25
IIA, IIIA, IVA: <i>Benchmarks for Science Literacy</i>	25
IIB and IIIB: <i>The National Science Education Standards</i>	25
IVB: <i>Making Sense of Secondary Science: Research</i>	
Into Children's Ideas	26
V: <i>Atlas of Science Literacy</i>	26
VI: <i>State Standards or District Curriculum Guides</i>	27

3. Engaging in Curriculum Topic Study	29
Getting Started	29
Gathering Your Resources	29
Becoming Familiar With the CTS Guides and Resources	31
Defining Your Purpose and Choosing Your Outcomes	31
Processing Information From CTS Sections	33
Activation and Processing Strategies	34
Reading the CTS Sections	35
Guiding Questions for Individual Sections of a CTS Guide	36
The CTS Learning Cycle of Inquiry, Study, and Reflection	36
Engagement	40
Elicitation	41
Exploration	42
Development	43
Synthesis	43
Application	46
Study Reflection and Self-Assessment	46
CTS Evaluation	47
Individual and Group Use of CTS	49
Individual Use of CTS	50
Group Use of CTS	51
4. Utilizing Curriculum Topic Study for Different Contexts	53
CTS and Science Content Knowledge	55
Using a CTS Guide to Identify the Content Knowledge Needed to Teach a Topic	55
Using CTS to Examine the Hierarchal Structure of Content Knowledge in a Topic	57
CTS and Curriculum	61
Curriculum Coherence and Articulation	63
Curriculum Selection	65
Supporting Curriculum Implementation	69
CTS and Instruction	74
Reviewing and Modifying Lessons	76
Developing a Standards- and Research-Based Lesson	76
CTS and Inquiry-Based Instruction	77
CTS and Assessment	79
Designing Assessment Probes	80
Developing Culminating Performances	83
CTS and Preservice and Novice Teacher Support	86
CTS and Leadership Development	87
CTS and Professional Development	88
Embedding CTS in a Variety of Professional Development Strategies	88
Study Groups	88
Case Discussions	89
Curriculum Selection and Implementation	89
Workshops	89

Examining Student Work and Thinking	90
Lesson Study	90
Mentoring, Coaching, and Demonstration Lessons	90
5. Images From Practice	91
Vignette #1: A High School Integrated Science Teacher Uses CTS to Understand Gravity-Related Content	91
Vignette #2: An Experienced Middle School Teacher Uses CTS to Revise a Unit on Biological Classification	92
Vignette #3: A Team of Primary Teachers Uses CTS to Identify Goals for Learning About Life Cycles	96
Vignette #4: A Middle School Teacher Uses CTS to Understand a Difficult Concept to Teach: Density	98
Vignette #5: A Teacher Leader Uses CTS to Help Guide Fifth-Grade Teachers' Implementation of the Ecology Content Standards	100
Vignette #6: A Fourth-Grade District Team Uses CTS to Examine Alignment of Curriculum, Instruction, and Assessment	103
Vignette #7: A High School Physics Teacher Uses CTS to Design Energy Lessons Based on Research on Learning	104
Vignette #8: An Elementary Teacher Uses CTS to Improve Opportunities to Learn for Her Disadvantaged Students	106
Vignette #9: Professional Developers Use CTS to Redesign Their Inquiry-Based Workshops	108
Vignette #10: A GLOBE Curriculum Developer Uses CTS to Develop Instructional Materials	110
6. The Curriculum Topic Study Guides	113
Organization of the CTS Guides	113
Descriptions of the CTS Categories	114
Diversity of Life	114
Ecology	122
Biological Structure and Function	134
Life's Continuity and Change	146
Matter	157
Earth	174
Astronomy	193
Energy, Force, and Motion	204
Inquiry and the Nature of Science and Technology	228
Implications of Science and Technology	255
Unifying Themes	267
Resource A: Additional Resources to Support Curriculum Topic Study	273
Resource B: Worksheets for Curriculum Topic Study	277
References	283
Index	287
