

Installing EES

- 1.) Create a folder on your C: drive called C:\EES32

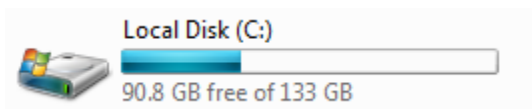

Figure 1: Local disk C drive (where EES folder is created).

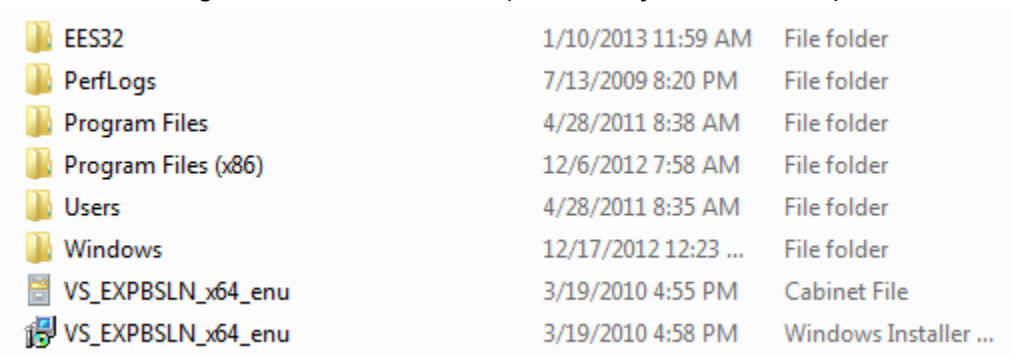

Figure 2: Newly created EES folder.

- 2.) Download the zip file and extract all files into the EES32 folder. After downloading the zip file, a setup file and a DFT file will download into the “downloads” folder. To extract the files, simply double-click on the setup file. After extracting all files, drag and drop the DFT file into the EES32 directory (i.e. open the EES directory from the C drive and find and replace the DFT file).

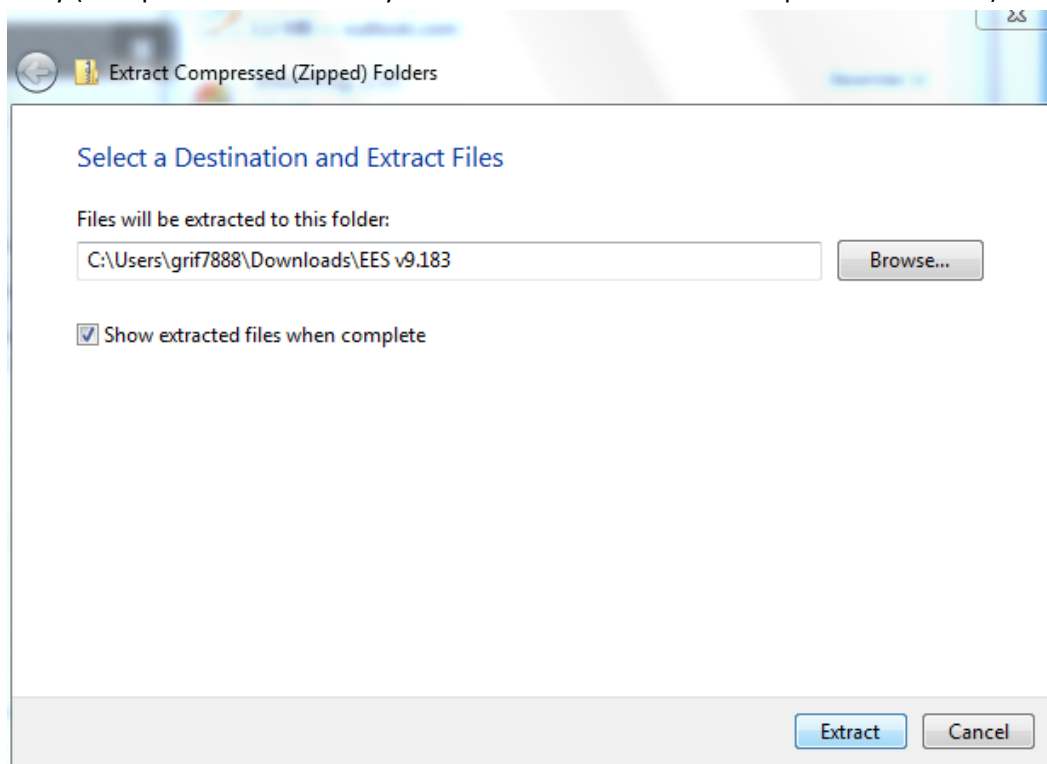

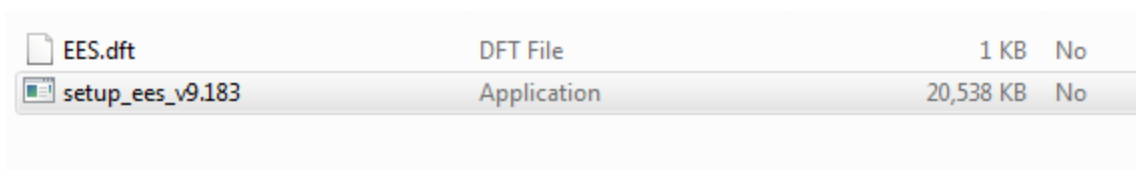

Figure 3: Extracting files from the setup file.

EES.dft	DFT File	1 KB	No
setup_ees_v9.183	Application	20,538 KB	No

Figure 4: Files in "download" file after downloading zip.

3.) Run the setup file to complete the installation.
