

# A5

Stat 422

Sections 1 and 10

Fall 2018

## Instructions

- (1) Read all instructions carefully.
- (2) Homework submission instructions are on the class webpage in the assignments link
- (3) All problems from the book are the problems that are at the end of the chapter (as an example, number 1 is 8.8, that is chapter 8 problem 8).
- (4) There are some datasets for problems on the class website in the Data link

**NOTE:** Due to some inconsistencies in book editions, you will need to use only the datasets posted on the class website, regardless of the edition you are using so that everyone is working with the same datasets.
