Table 1: Grading rubric

| <b>Topic</b>   | <b>Points</b> | <b>Earned</b> |
|--|---------------|---------------|
| <b><i>I. Logistics</i></b>                                     | <b>85</b>     |               |
| 1. Intro   | 10            |               |
| 2. Sampling design   | 10            |               |
| <i>a. NOT SRS</i>  |               |               |
| <i>b. Identify frame, population, etc.</i>                     |               |               |
| 3. Methods (how sample was drawn)                              | 10            |               |
| 4. Analysis  | 45            |               |
| <i>a. Basic summary statistics</i>                             |               |               |
| <i>b. Appropriate graphs</i>                                   |               |               |
| 5. Conclusion  | 10            |               |
| <i>a. Interpret results and conclusion</i>                     |               |               |
| <i>b. Insights about project, new ideas</i>                    |               |               |
| <b><i>II. Basic structure</i></b>                              | <b>15</b>     |               |
| A. Followed directions   |               |               |
| B. Basic organization (not scattered, information easy to see) |               |               |
| <b>Total possible points</b>                                   | <b>100</b>    |               |
